WORKING PLAN

|  | Objectives |  | Activities |
| :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { YEAR } \\ \text { I } \end{gathered}$ | 1 | The establishment of the trickling biofilter mathematical model | A1.1 The modelling of the trickling biofilter using the equations of biofilm constitution |
|  |  |  | A1.2 The identification of an ASM type model structure appropriate for the trickling biofilter |
|  |  |  | A1.3 The biofilter modelling using the ASM type model stated at the activity A1.2 |
|  |  |  | A1.4 The comparison of the obtained results from both models of the biofilter, deduced at the activities A1.1 and A 1.3 |
|  |  |  | A1.5 The dissemination of the obtained results and the performing of research-documentation stages |
|  |  |  | A2.1 The identification of the mathematical model structure for the fish culture tanks |
|  | 2 |  | A2.2 The modelling of the fish culture tanks |
|  |  | the fish culture tanks | A2.3 The purchasing of equipments and materials for the project development |
|  |  |  | A2.4 Project management activities |
| $\begin{gathered} \text { YEAR } \\ \text { II } \end{gathered}$ | 1 | The establishment of the global mathematical | A3.1 The modelling of all aquaculture plant elements |
|  |  | model for the aquaculture plant | A3.2 The aggregation of the models presented at the activity A3.1 for obtaining the global model of the aquaculture plant |
|  |  |  | A3.3 The accomplishment of a software for simulate the aquaculture installation using the model obtained at the activity A3.2 |

|  |  |  | A3.4 The comparison of the simulation results with the experimental data acquired from the aquaculture plant of UDJG |
| :---: | :---: | :---: | :---: |
|  |  |  | A3.5 The dissemination of the obtained resulted and the performing of research-documentation stages |
|  |  | The establishment of control strategies for the aquaculture plant | A4.1 The knowledge acquisition from the analytical model of the aquaculture plant |
|  |  |  | A4.2 The knowledge acquisition from the experiments made on the aquaculture plant of UDJG |
|  | 2 |  | A4.3 The elaboration of a hierarchical intelligent control system for the aquaculture plant |
|  |  |  | A4.4 The purchasing of the required materials for the project development |
|  |  |  | A4.5 Project management activities |
